OBEN v2 Tokens – Initial Uniswap v3 Framework (0.3% Fee Tier)

1. ORION – Governance / Sovereign Rail Token

- Role:

    - Top-tier, governing / sovereign token

    - Tightest price band, highest relative value

- Uniswap v3 Pool:

    - Pair: ORION / ETH

    - Fee tier: 0.3%

- Initial design price (midpoint):

    - 1 ORION = 0.10 ETH

- Active price range (tight band):

    - Min: 1 ORION = 0.07 ETH

    - Max: 1 ORION = 0.13 ETH

    - (≈ ±30% around mid; "governance-grade" stability)

---

2. LITHIUM – Private / Enterprise Rail Token

- Role:

    - Mid-tier, private / enterprise token

    - Medium price band, mid value

- Uniswap v3 Pool:

- - Pair: LITHIUM / ETH

  - Fee tier: 0.3%

- Initial design price (midpoint):

  - 1 LITHIUM = 0.03 ETH

- Active price range (medium band):

  - Min: 1 LITHIUM = 0.015 ETH

  - Max: 1 LITHIUM = 0.06 ETH

  - (0.5× to 2× mid; more flexibility than ORION)

---

3. LIBRA – Public / Retail Rail Token

- Role:

  - Public-facing, high-access token

  - Widest price band, most affordable value

- Uniswap v3 Pool:

  - Pair: LIBRA / ETH

  - Fee tier: 0.3%

- Initial design price (midpoint):

  - 1 LIBRA = 0.003 ETH

- Active price range (wide band):

  - Min: 1 LIBRA = 0.0005 ETH

  - Max: 1 LIBRA = 0.01 ETH

    ○ (Wide range to absorb public-market volatility while staying low-cost)

Notes for your patent / records (short)

- Total supply: 100,000,000 of each token (ORION, LITHIUM, LIBRA).

- Initial liquidity set aside: 1,000,000 of each token for Uniswap v3 pools.

- All three pools: paired against ETH, 0.3% fee tier, with tiered price bands:

    - ORION = tight, high-value governance

    - LITHIUM = medium band, enterprise

    - LIBRA = wide band, public / retail affordability
